Destinator Quick Start Instructions

- Put the antenna at a 90 degree angle.
- Press the power button to turn on the GPS unit.
- From the “Top Menu” page choose “Navigation.”
- From the “Warning” screen, read the warning, and choose “agree.”
- When it asks to start the Destinator tutorial choose “no” (if you would like to do the tutorial choose “yes”, and follow the instructions provided in the tutorial).
- Choose “Settings” in the lower left hand corner.
- Choose “back” in the lower left hand corner.
- Choose “Map Manager.”
- Choose “Select Map.”
- Scroll down using the down arrow, located on the right, to select you state (note: if at all possible do not choose “USARoads” as your option), then press “select.”
- Choose “menu.”
- From the “Destinations” screen choose “Address.”
- Select your state and press next (to navigate through the states use the provided letters on the keypad).
- Select your city and press next (to navigate through the cities use the provided letters on the keypad).
- Using the letters enter the street and press next.
- Enter your street number using the number pad and press next.
- The GPS will then find a satellite and begin to navigate.
